

Plate Rolls and Angle Rolls

History

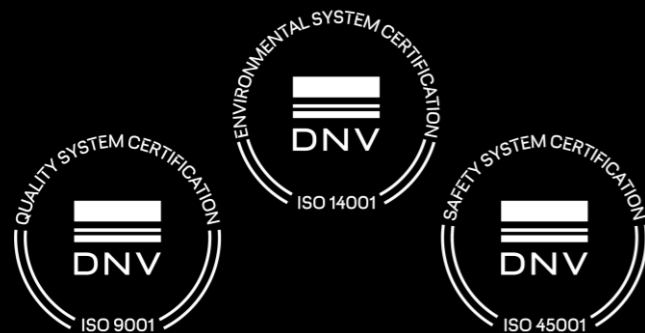

Since 1966

Davi is the world largest manufacturer of plate rolls, angle rolls, high productivity rolling lines and customized rolling machines in terms of sales volume, employees, production, assets, rating

Certifications

Of Quality ISO 9001,
Environment ISO 14001
And Safety ISO 45001

Constantly
verified
and certified
by DNV

Financial strength

Davi Has Been Given
Maximum Commercial
Reliability By D&B

Since several years, DAVI has
been rated 'Prime Company'
by Dun & Bradstreet

DAVI Product Range

**Plate rolls
(3 & 4 rolls)**

Angle rolls

**Wind Energy
Lines**

**High Productivity
Lines**

**Customized
Machines**

10,000
Machines
Installed
Worldwide

**Our machines
support dozens
of different
industrial
sectors
all over the
world**

A dark gray world map with the country of Italy highlighted in a bright red color. The map shows the outlines of continents and oceans.

Italy

Headquarter

DAVI headquarter is located in **the most high-tech region of Italy** and consists of offices, **R&D department**, workshops and **logistic & quality control center**

Subsidiaries

United States & China

Worldwide presence, including
**subsidiaries in United States and
China** and a global sales & service
network with **over 100 highly qualified
dealers**

Always on Time

Immediate Delivery

100

Machines

ready for immediate delivery

All in our workshops, even those for **heavy industries**

Production

300

Machines

per year

Since many years, **the most sold in the market**

Installed Machines

10,000

Machines

All over the world

Work every day to support the growth of our customers around the world

INDUCTION HARDENING

BEVELING

WELDING

Total Control of the Production System

- ✓ Integrated Quality Control throughout the entire flow
 - ✓ Complete management of the manufacturing process
 - ✓ Partnership with high-level companies (production sites located in the most skilled areas in Italy)
 - ✓ Logistic center, warehouse, assembly, set-up and testing plants separate from production

TURNING

MILLING

FORGING

TESTING

Remote customer support

Remote connection is fundamental to immediately solve any kind of issue Our highly professional and **specialized team is ready to connect remotely** with every part of the world in order to reduce downtime

Customer Support on site

Our dedicated team can help with **on site intervention**, on machines of both DAVI and all other main brands
Our technicians are always available to assist for **installation, commissioning, training and preventive maintenance** in every corner of the five continents

On Site Support

Engineering everyday challenges

The Davi Research & Development division can help by designing custom **made solutions based on customers' needs**

iRoll eXtreme and iRoll Performance

Everything under control at all times

Always the best results thanks to Davi exclusive Artificial Intelligence (AI). Programming environment extracts the very best from both the most and the least experienced Operators.

READY FOR INDUSTRY 4.0!

Unrivaled precision

Next-generation actuators ensure centesimal accuracy

Increased productivity

The rolling process is accelerated with smooth and simultaneous movements across multiple axes

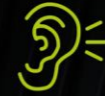

Reduced maintenance

No lubrication required due to the absence of hydraulic control units

Low consumption

The start&stop system allows for zero consumption when the plate roll is powered on but not operational

Silent operation

Maximum silence both in standby and operational mode, thanks to the start&stop feature

Ease of installation

The reduced number of components ensures a simple and fast installation

Compact design

The absence of a hydraulic control unit reduces the space occupied by the plate roll

DAVI e-POWER[®]

The **FIRST** complete line of **FULL ELECTRIC** plate rolls
